

INDEX, Vol. 54

- Abbas, N.
see Torroni, A. *et al.*
- Abbott, C. M.
see Jeremiah, S. J. *et al.*
- Adriaansen, H. J., Geurts van Kessel, A. H. M., Wijdenes-De Bresser, J. H. F. M., Van Drunen-Schoenmaker, E. & Van Dongen, J. J. M.
expression of the myeloid differentiation antigen CD33 depends on the presence of human chromosome 19 in human-mouse hybrids, 115
- Africans. Y chromosome DNA polymorphisms in human populations: differences between Caucasoids and...detected by 49a and 49f probes, 287
- age at onset. On the estimation of the...distribution in Huntington's chorea using the EM algorithm, 225
- age of onset. Using...to distinguish between subforms of breast cancer, 169
- Agger, M. S.
see Bonné-Tamir, B. *et al.*
- Andrews, V.
see Morton, N. E. *et al.*
- Attwood, J.
see Edwards, Y. *et al.*
- Attwood, J.
see Griffiths, B. *et al.*
- Babron, M.-C., Constans, J., Dugoujon, J. M., Cambon-Thomsen, A. & Bonaïti-Pellié, C.
the *Gm-Pi* linkage in 843 French families: effect of the alleles *Pi Z* and *Pi S*, 107
- Battistuzzi, G.
see Viglietto, G. *et al.*
- Bearn, A. G.
review of *Garrod's Inborn Factors in Disease*, edited by C. R. Scriver & B. Childs, 99
- Beeson, D., Jeremiah, S., West, L. F., Povey, S. & Newsom-Davis, J.
assignment of the human nicotinic acetylcholine receptor genes: the alpha and delta subunit genes to chromosome 2 and the beta subunit gene to chromosome 17, 199
- Bekeer, R.
see Bonné-Tamir, B. *et al.*
- Berg, E. S., Markussen, G., Teisberg, P. & Olaisen, B.
use of DNA amplification (PCR) and direct DNA sequencing in the characterization of C4 alleles, 183
- Berger, R.
see Law, M. L. *et al.*
- Bernstein's methods. Comparison of simple and modified...in estimation of recessive allele frequency in the HLA system, 91
- Betts, P. R.
see Jacobs, P. A. *et al.*
- Beutler, E. & Gelbart, T.
Gaucher disease associated with a unique *KpnI* restriction site: identification of the amino-acid substitution, 149
- Board, P. G.
see Griffiths, L. R. *et al.*
- Bonaïti-Pellié, C.
see Babron, M.-C. *et al.*
- Bonné-Tamir, B., Frydman, M., Agger, M. S., Bekeer, R., Bowcock, A. M., Hebert, J. M., Cavalli-Sforza, L. L. & Farrer, L. A.
Wilson's disease in Israel: a genetic and epidemiological study, 155
- Bowcock, A. M.
see Bonné-Tamir, B. *et al.*
- Brambilla, C., Frontali, M., Malaspina, P. & Rossi, C.
on the estimation of the age at onset distribution in Huntington's chorea using the EM algorithm, 225
- breast cancer. Using age of onset to distinguish between subforms of, 169
- Buckland, R.
see Griffiths, L. R. *et al.*
- Burchell, B.
see Harding, D. *et al.*
- χ^2 tests. On the use of...for nested categorized data, 315
- C4 alleles. Use of DNA amplification (PCR) and direct DNA sequencing in the characterization of, 183
- C6 and C7. The assignment of the genes coding for human complement components...to chromosome, 5, 141
- Calabrò, V.
see Viglietto, G. *et al.*
- Callen, D. F.
see Griffiths, L. R. *et al.*
- Cambon-Thomsen, A.
see Babron, M.-C. *et al.*
- carbonic anhydrase. The polymorphic human DNA sequence *D8S8* assigned to 8q13-21.1, close to the...gene cluster, by isotopic and non-isotopic *in situ* hybridization and by linkage analysis, 131
- Cavalli-Sforza, L. L.
see Bonné-Tamir, B. *et al.*
- CD33. Expression of the myeloid differentiation antigen...depends on the presence of human chromosome 19 in human-mouse hybrids, 115
- Chan, S. D. H.
see Law, M. L. *et al.*
- Chantret, I.
see Darmoul, D. *et al.*
- Charcot-Marie-Tooth disease. Isolation and use of chromosome 1 probes for linkage studies on, 31
- Cheah, K. S. E.
see Law, M. L. *et al.*

- chiasmata. The topology of meiotic...prevents terminalization, 307
- Chin, K.
see Mathew, C. G. P. *et al.*
- chromosome 1. Isolation and use of...probes for linkage studies on Charcot-Marie-Tooth disease, 31
- chromosome 2. Assignment of the human nicotinic acetylcholine receptor genes: the alpha and delta subunit genes to...and the beta subunit gene to chromosome 17, 199
- chromosome 2. Isolation of a cDNA probe for the human intestinal dipeptidylpeptidase IV and assignment of the gene locus *DPP4* to, 191
- chromosome 5. The assignment of the genes coding for human complement components C6 and C7 to, 141
- chromosome 6. The gene for the $\alpha 2$ chain of the human fibrillar collagen type XI (*COL11A2*) assigned to the short arm of, 23
- 8q13-21.1. The polymorphic human DNA sequence *D8S8* assigned to..., close to the carbonic anhydrase gene cluster, by isotopic and non-isotopic *in situ* hybridization and by linkage analysis, 131
- chromosome 10. Regional localization of polymorphic markers on...by physical and genetic mapping, 121
- chromosome 10. Standard maps of, 235
- chromosome 11p15. Assignment of the polymorphic intestinal mucin gene (*MUC2*) to, 277
- chromosome 17. Assignment of the human nicotinic acetylcholine receptor genes: the alpha and delta subunit genes to chromosome 2 and the beta subunit gene to, 199
- chromosome 19. Expression of the myeloid differentiation antigen CD33 depends on the presence of human...in human-mouse hybrids, 115
- Claus, E. B., Risch, N. J. & Thompson, W. D.
using age of onset to distinguish between subforms of breast cancer, 169
- Clerget-Darpoux, F.
see Prum, B. *et al.*
- Cockwell, A. E.
see Jacobs, P. A. *et al.*
- collagen. The gene for the $\alpha 2$ chain of the human fibrillar...type XI (*COL11A2*) assigned to the short arm of chromosome 6, 23
- Collins, A.
see Morton, N. E., 103
- Collins, A.
see Morton, N. E., 235
- complement. The assignment of the genes coding for human...components C6 and C7 to chromosome 5, 141
- Constans, J.
see Babron, M.-C. *et al.*
- counting algorithms for linkage, 103
- Crolla, J. A.
see Jacobs, P. A. *et al.*
- Curtis, D.
a program to draw pedigrees using LINKAGE or LINKSYS data files, 365
- D8S8*. The polymorphic human DNA sequence...assigned to 8q13-21.1, close to the carbonic anhydrase gene cluster, by isotopic and non-isotopic *in situ* hybridization and by linkage analysis, 131
- Darmoul, D., Lacasa, M., Chantret, I., Swallow, D. M. & Trugnan, G.
isolation of a cDNA probe for the human intestinal dipeptidylpeptidase IV and assignment of the gene locus *DPP4* to chromosome 2, 191
- dipeptidylpeptidase IV. Isolation of a cDNA probe for the human intestinal...and assignment of the gene locus *DPP4* to chromosome 2, 191
- DiScipio, R. G.
see Jeremiah, S. J. *et al.*
- DNA polymorphism. The human Y chromosome shows a low level of, 297
- DNA polymorphisms. Y chromosome...in human populations: differences between Caucasoids and Africans detected by 49a and 49f probes, 287
- DPP4*. Isolation of a cDNA probe for the human intestinal dipeptidylpeptidase IV and assignment of the gene locus...to chromosome 2, 191
- Driesel, A. J.
see Griffiths, L. R. *et al.*
- Dugoujon, J. M.
see Babron, M.-C. *et al.*
- D'Urso, M.
see Viglietto, G. *et al.*
- Easton, D.
see Mathew, C. G. P. *et al.*
- Edwards, J. H.
the linkage detection problem, 253
- Edwards, Y., Williams, S., West, L., Lipowicz, S., Sheer, D., Attwood, J., Spurr, N., Sarkar, R., Saha, N. & Povey, S.
the polymorphic human DNA sequence *D8S8* assigned to 8q13-21.1, close to the carbonic anhydrase gene cluster, by isotopic and non-isotopic *in situ* hybridization and by linkage analysis, 131
- EM algorithm, the. On the estimation of the age at onset distribution in Huntington's chorea using, 225
